SUMMARY

Software Engineer with 1 year of internship experience building production applications using Java, Spring Boot, React, React Native, and PostgreSQL. Experienced in developing scalable REST APIs, real-time systems, and authentication. Passionate about designing reliable backend systems and solving complex engineering problems.

EXPERIENCE

Software Development Engineer (Intern), Turno — Bengaluru *Apr 2026 – Present*

- Built an IoT battery-monitoring platform using Spring Boot, WebSocket/STOMP, PostgreSQL, TimescaleDB, Redis, and Liquibase to process real-time EV battery telemetry.
- Developed a React Native mobile application providing real-time battery analytics, live charging status, and STOMP-based updates.
- Designed and shipped an admin dashboard in React + TypeScript (Vite, Tailwind, Zustand) with fleet-wide battery-health views, Leaflet device maps, Recharts analytics, and one-click PDF report exports.
- Implemented shared authentication across mobile and web using Spring Security with JWT access/refresh token rotation and role-based access, from a single backend serving both consumer and admin surfaces.
- Built OCR-based document auto-validation for loan onboarding, automating extraction and field-level validation across document types (PAN, Aadhaar, insurance, vehicle RC, and others) for multiple NBFC partners.

Software Developer (Intern), KineticAge — Bengaluru *Aug 2025 – Feb 2026*

- Built and integrated backend REST APIs (Node.js) with the admin panel and mobile app, including MongoDB CRUD, aggregation pipelines, and JSON import/export.
- Wired REST APIs into the UI (data rendering, form submissions, error states) and validated and debugged endpoints in Postman.
- Customized Shopify themes and managed products and orders; built webhook-driven notification workflows delivering real-time updates to team channels.

TECHNICAL SKILLS

Languages: Java, Python, SQL, TypeScript, JavaScript, C

Frontend: React, React Native (Expo), Tailwind CSS, Zustand, TanStack Query, Recharts, Leaflet, HTML, CSS

Backend: Spring Boot, Spring Security (JWT), Node.js, Express.js, Hibernate, REST APIs, WebSocket/STOMP

Data & Infrastructure: PostgreSQL, TimescaleDB, Redis, MySQL, MongoDB, Liquibase

DevOps & Tools: Jenkins (CI/CD), Git & GitHub, Postman, Webflow, Shopify

PROJECTS

Turno Battery – Customer Mobile App & Admin Dashboard — React Native mobile app and React (TypeScript) admin dashboard for EV battery monitoring and fleet management with real-time updates, JWT authentication, battery analytics, role-based access control, and PDF report generation.

FloralNest — Flower-delivery platform (Shopify web + mobile app) with custom product pages, checkout, payments, and order tracking.

Grid Stability Prediction — ML model (Python) predicting grid instability in smart-energy networks from real-time and historical data.

EDUCATION

B.Tech, Computer Science & Engineering — Kuppam Engineering College *2021 – 2025 | 75%*

CERTIFICATIONS

Full-Stack Web Development – Tap Academy • Full-Stack Java – SkillDzire • Product Intern – VISIST AI Technologies Pvt. Ltd.
